SIMATS ENGINEERING

ASSESSMENT TOOL 1: Short Answer Test

COURSE NAME: Cloud Computing and Big Data Analytics **COURSE CODE:** CSA15

COURSE OUTCOME COVERED

CO1: *Apply cloud computing technologies including hardware-software evolution, virtualization, web services, and service models to develop cloud-based solutions.* (BL2)

Assessment Tool Weightage: 40%

Dave's Taxonomy: Imitation (Level 1) **Total Marks: 25**
Question Count: 5

Code of Conduct

I _____ (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment.
I understand that any violation of academic integrity rules will result in disciplinary action.
Signature of the student: _____

Assessment Tasks

Short Answer Test

1. Define cloud computing and explain any four characteristics that make it different from traditional on-premise computing.
2. Trace the evolution of cloud computing from hardware evolution to internet software evolution, and show how these changes enabled modern cloud platforms.
3. Explain the role of server virtualization in cloud computing. Differentiate between virtualization as an enabling technology and cloud computing as a service model.
4. Discuss the role of **data centers** in delivering cloud services..
5. Differentiate IaaS, PaaS, SaaS, and XaaS with one suitable real-world example for each model.

Short Answer Test Rubric

Criteria	Weightage	Level 4 - Exemplary	Level 3 - Proficient	Level 2 - Developing	Level 1 - Beginning
Conceptual Accuracy	30%	Accurate definitions and precise explanation of all key terms	Mostly accurate with minor gaps	Partial understanding with noticeable errors	Incorrect or irrelevant explanation
Coverage of Concepts	20%	Covers all expected sub-points completely	Covers most expected points	Covers only basic points	Very limited coverage
Use of Examples	15%	Uses highly relevant cloud examples to strengthen the answer	Uses relevant examples with minor mismatch	Uses vague or partially relevant examples	No useful examples
Comparison / Differentiation	20%	Clearly distinguishes concepts with strong logic	Reasonable differentiation with minor overlap	Comparison is weak or incomplete	Fails to differentiate concepts
Clarity of Expression	15%	Clear, organized, and concise answer writing	Generally clear with few issues	Understandable but poorly organized	Difficult to follow

CO 1 - Unit - 1

Short Answer test

Name: Kavipriya. A

Reg: 192511201

Slot : D

CSA 1515

1. Cloud Computing
2. Evolution of clodd computing
3. Server Virtualization
4. Data centre
5. Iaas , Paas , Saas , Xaas .

1. Cloud computing :-

definition :-

Cloud Computing delivers computing services over the Internet.

* provides online storage
* offers Computing resources
* Accessible from anywhere.
* perform programs and execute over Internet.

REDMI 15 5G

REDMI 15 5G

2. Evaluation of cloud computing:-

⇒ It evaluates like a web server.

⇒ Main frame computer - centralized computer.

⇒ traditional web servers - web 1.0, 2.0, 3.0 etc.

⇒ personal computer - client, server relationship.

⇒ Virtualization - one physical server called as multiple program.

⇒ Modern cloud platform.

3. Types:-

Infrastructure as a service - Virtual Infrastructure
eg: AWS, EC2.

Paas:- Platform as a service - platform for developing diff. apps
eg: Google app engine.

Saas:- Software as service - Ready to use service.
eg: Gmail, Google.doc.

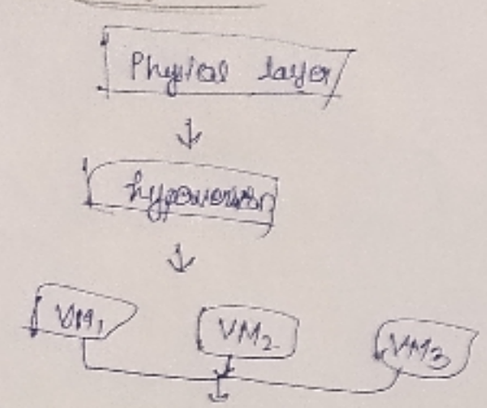

Xaas:- Everything as a service - perform all type of Service in one
eg: Linux, windows.

REDMI 15 5G

Name: Kavipriya A

3. Server Virtualization -

4. Data centres :-

A data center is a physical security that contains servers, data processing system, storage.

⇒ Data storage
⇒ security
⇒ Networking
⇒ processing.
